

Coolers/Chillers

IWP stocks high quality reliable coolers. The "Ultra" and "Mini" coolers feature advanced controls. The "Contemporary" and "Standard" coolers feature the simplest designs ideal for the highly competitive rental market. Under counter Chillers are popular for light commercial and residential applications.

The cup holder connects directly to the "Standard" cooler or can be wall mounted.

All RO and filter units include a leak protection device. Add to existing coolers and filter systems you have in the field for enhanced liability protection.
